

Please reject NAB's petition 04-160. I have XM Radio and appreciate the local traffic and weather station as it assists in my traveling and avoiding gridlock. Since the Dallas Fort Worth area is under pressure to improve the quality of air in the Metroplex, the ability to offer drivers a way to avoid sitting in heavy traffic delays must be a top priority. The XM Radio Instant Traffic & Weather option allows that and should not be stopped.

Stephen R. Williamson
